Keller minimal windows® **guardline**

High-class all-glass railing for a beautiful look and timeless design

The tested all-glass railing radiates architectural perfection and impresses with top quality and visual lightness. Only the glass is visible.

The innovative product represents the perfect combination of glass and metal. Keller minimal windows® **guardline** is approved for use in both the public and private sector.

KELLER minimal windows®

Keller minimal windows® **guardline**

Keller minimal windows® **guardline** captivates with its clever design without edge protection and thus allows an uninterrupted view with maximum safety. The double-sided railing connection is flush. The very slender U-profile fuses with the minimal windows® frame profile at the point of contact. The fastening is thus barely visible.
The minimal windows® **guardline** premium product is the elegant solution for uncompromising transparency.

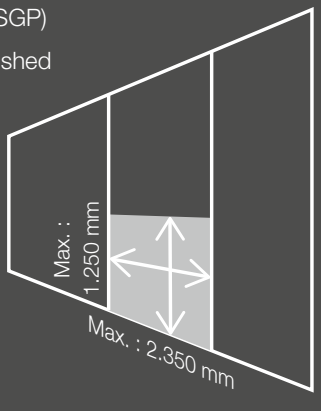

THE ADVANTAGES

- Timeless, reduced design - visually delicate
- Flexible integration in both Keller minimal windows® series
- Impact-proof
- Permanently UV-resistant and dimensionally stable
- Unlimited visibility
- Full-surface digital print possible
- U-profile in construction colour
- Drainage integrated in the system
- Balustrade glazing flush on the outside
- Modular system structure - maintenance-free

TECHNICAL CHARACTERISTICS

- Safety barrier glazing with verified type calculation
- No edge protection necessary (according to DIBt - German Institute of Building Technology)
- Glass thickness: 17.5 mm (8/1.5/8) or 21.5 mm (10/1.5/10) depending on statics
- LSG made of heat-strengthened glass (HSG) with SentryGlass® Plus film (SGP)
- Glass edges ground and polished
